

**EURAL GNUTTI S.p.A.** is committed:

- to assure that its activities will be made according to the laws in force and to the possible underwritten practise codes;
- to carry out every effort in organizational, operative and technological terms for a continuous improvement of its environmental and energy management system and for the prevention of the pollution of soil, water and air;
- to determine environmental and energy objectives and targets to be integrated with our plant management;
- to reduce, where technically possible and economically sustainable, every negative impact on the environment and of its activities, products and services;
- to create technologically advanced products with less environmental impact, even in a life cycle perspective;
- to minimize where technically possible and economically sustainable, the energy consumption of its activities;
- to minimize the production of its waste, favouring the recovery where possible;
- minimize the consumption of water and raw materials;
- to take into account the explicit and implicit needs of the customers and of the external involved parties.

Rovato, 20.11.2017

Chief Executive  
(dott. Giuliano Gnutti)
