

EURAL GNUTTI S.p.A. policy is as follows:

- Ensure that its activities are carried out in compliance with applicable legal provisions and any subscribed codes of practice.
- Implement every effort in organisational, operational and technological terms for the continuous improvement of its environmental and energy management system, for the prevention of soil, water and air pollution, for the continuous improvement of their quality and for the optimisation of energy performance.
- Define environmental and energy objectives and plan activities to achieve them by integrating them into operational plant management.
- Set targets to promote renewable energy to tackle climate change and reduce greenhouse gas emissions. Make every effort to expand the supply of renewable, sustainable energy that does not deplete natural resources and to continuously reduce carbon emissions.
- Produce technologically advanced products with lower environmental and energy impact, also from a life cycle perspective.
- Reduce, where technically possible and economically sustainable, any negative impact of its activities, products and services on the environment.
- Reduce, where technically possible and economically sustainable, the energy consumption of its activities by using supplies of goods and services with the best energy performance and optimising processes.
- Minimising the consumption of water and raw materials, favouring their recovery and recycling.
- Manage chemicals responsibly, as far as possible by reducing their consumption and constantly searching for less environmentally hazardous substances.
- Limiting noise emissions in the outdoor and indoor environment by adopting the best technologies.
- Minimise the production of waste, favouring its recovery wherever possible.
- Implement all efforts through common actions and strategies aimed at reducing greenhouse gases that contribute to global warming and climate change, in compliance with existing international agreements and regulations.
- Acknowledge the explicit and implicit needs of customers and stakeholders in general.
